BIBLIOGRAPHY OF NORTH AMERICA'S MOUNTAIN GOAT  
(*Oreamnos americanus*)

This bibliography hopefully encompasses all of the published literature on mountain goat for the period 1900 to 1979 inclusive. References vary from critical scientific studies to those making casual reference to goats. Species lists referring to mountain goat and books on wildlife of the newest edition are primarily included. Reference to typescript, multilith and mimeograph reports of government and professional agencies is undoubtedly incomplete, however many of those citations presented may lead one to discover other such report forms by the said author if further enquiry is made. A few articles are incompletely cited but are included in hope that their source may be known or discovered by the interested reader. A plea is made to all readers for submission of corrections to the author regarding incorrect, incomplete or omitted citations. Notification of future articles on mountain goat will also be appreciated for inclusion in a revised edition of this bibliography.

The largest single source of information utilized in compiling the present bibliography were the works of F.J. Singer and myself, Castle (1965) and Hibbs (1966). The approach in acquiring information was often unorthodox and time-consuming, but seemed essential if the bibliography was to be as current as possible. From the lists of Castle (1965) and Hibbs (1966), a preliminary reference file was compiled and checked with the card catalogue at the University of British Columbia's Main Library. A search of "Literature Cited" was then performed with new references added to the main list. Biological Abstracts and Wildlife Review were employed for the period 1960-1979, and the CAN SDI search profile of F.I. Bunnell had included 'Oreamnos' since August, 1974. Singer utilized CAIN, the Denver Public Library-Fish and Wildlife Reference Service, the American Society of Mammalogists Special Bibliograph Search, and the United States Department of the Interior Computerized Search Services, in 1976. Current publications on mountain goat from this date onward were updated by checking all articles in the Pre-Bind section of U.B.C.'s Woodward Library. This procedure was necessary because computer-based searches may lag by 18 months or more. Alberta and British Columbia Provincial game agency personnel and Alaska, Colorado, Idaho, Montana, Oregon, South Dakota, Utah and Wyoming State game service employees provided recent reports from their respective Departments. In particular, references from D.M. Hebert and L. Kuck were very helpful.

Thanks are extended to Engel Rahe for her work in tracing and correcting many of the listed citations from the preliminary draft. Preparation of this bibliography was in part supported by a grant from the British Columbia Fish and Wildlife Branch to Dr. Bunnell as part of CARP (Computer Assisted Resource Planning) and by computer access granted by U.B.C.'s Department of Animal Sciences through my supervisor, Dr. D.M. Shackleton.
